# THE LITTLE POOL Pistoche

## PROTECTION

### SELF-RETRACTING PROTECTIVE COVER.\*

Pistoche pools are equipped with a protective cover to close the pool and prevent access while the pool is not in use. In addition, because you can never be too careful, this cover can withstand the weight\*\* of little explorers who happen to climb on top of it.

In addition to securing the pool, the cover protects the pool against evaporation and night time cooling. It also prevents pollen, dust and leaves from falling into the pool. The water stays clean, always ready for your little swimmers. A Pistoche exclusive!

1 The cover is built into a cover pit that is hidden under the edging.

2 Once the edging on all 4 sides has been lifted, the cover can be rolled out in just a few seconds by pulling on the strap, a sharp tug will cause the cover to automatically roll up.

3 Strong and hard wearing and fitted with a purpose designed fastening system, the cover can bear the weight of a small child.

\* This cover is no substitute for common sense or individual responsibility. Nor is it intended to replace the vigilance of parents and/or responsible adults which remains the key factor in ensuring the safety of young children.

\*\* 20 Kg max
